Specification

The disclosure is objected to under 37 CFR 1.71, as being so incomprehensible as to preclude a reasonable search of the prior art by the examiner. For example, the following items are not understood: the Specification, on pages 7-8 and 15, refers "2 mm~ plane" with respect to the indenter. Furthermore, claim 10 refers to the indenter having a 2 mm.phi. plane while claim 11 refers to the indenter having a 2 mmf plane.

Additionally, there are numerous references in the Specification to "Mm".

It appears that Applicant may have submitted some sort of scanned/OCR version of the Specification resulting in numerous ambiguities and inconsistencies.

Applicant is required to submit an amendment which clarifies the disclosure so that the examiner may make a proper comparison of the invention with the prior art.

Applicant should be careful not to introduce any new matter into the disclosure (i.e., matter which is not supported by the disclosure as originally filed).

Correction is required for both the claims and the Specification. In submitting an amendment Applicant should be clear in describing how the submitted changes relate to the inconsistent/incomprehensible version of the claims/Spec. such that it can be verified that no new subject matter is being added. I.e., a reasonable correspondence/explanation should exist for the improperly stated items in the original version versus the corrected/clarified items.

A shortened statutory period for reply to this action is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter.
